Excellent compromise

Dressilk® provides the best environment for wound healing while limiting both patient’s pain (no or less dressing changes) and hospital care costs.

**DRESSILK® is removed easily** from any part of the body after re-epithelialization.

**36 YEARS OLD PATIENT**

1**ST DAY**

Wound before and after debridement

Application of Dressilk®

Application of secondary dressing

**8TH DAY** Secondary dressing removed, wound is dry

**15TH DAY** Re-epithelialization continues, Dressilk® may be trimmed slowly

**29TH DAY** Complete wound healing

Merheim - Köln
Why choose DRESSILK®?

For staff
- Simple and user-friendly
- Easy to apply
- Remains in place until complete healing
- Removed easily
- Good healing at short term and good scarring at long term

For patients
- Comfortable in-use
- Remains in place until complete healing
- Reduces pain as no or reduced dressing changes needed
- Good scarring

For hospitals
- Saves personnel’s time
- Good healing
- Reduces costs
